KIOXIA

Disclaimer

Forward-looking statements included in this presentation are prepared based on our expectations and projections in light of the information currently available to us, which involve various risks and uncertainties (including, but not limited to, economic trends, market demand and the highly competitive semiconductor industry). Such risks and uncertainties may cause our actual results to be materially different from any future results expressed or implied by these forward-looking statements. We undertake no obligation to update any forward-looking statement included herein.

The information and projections regarding the flash memory industry included in this presentation are derived from information currently available to us. Whilst this presentation is provided in good faith, it does not purport to be comprehensive and has not been independently verified. We make no representations with respect to such information and projections.

This presentation includes Non-GAAP measures we use internally in making decisions. Non-GAAP measures exclude non-recurring items and other specific items from IFRS-based figures to more easily evaluate the Group's fundamental profitability. We believe that disclosing non-GAAP measures makes it easier for stakeholders to compare the Group's performance with that of other companies in the same industry and against previous fiscal years. Non-GAAP measures are used internally by us and are not accounting items based on IFRS, and have not been audited or reviewed by auditors. Therefore, such non-GAAP measures may not accurately reflect the Group's financial condition or operating results. "Non-recurring items" are temporary gains and losses that we consider should be excluded for non-GAAP measures, including the impact of purchase price allocation (PPA) arising from mergers and acquisitions, and the impact of significant changes to tax policies. "Other specific items" are gains and losses that we consider difficult to compare with other companies due to factors such as different accounting standards, including costs for the fiscal year recorded under the Group's continuous service and performance-linked stock-based remuneration plans.

This presentation includes internal measures which our management relies upon in making decisions (the "Non-GAAP Financial Measures") that differ from financial measures prepared in accordance with International Financial Reporting Standards ("IFRS"). The Non-GAAP Financial Measures, which are IFRS measures plus adjustments made for non-recurring items, have not been audited or reviewed by auditors. Therefore, such Non-GAAP Financial Measures may not accurately reflect our financial condition or operating results.

This presentation was prepared to provide information on our consolidated financial results for the third quarter of fiscal year ending March 31, 2026 and does not constitute, or form a part of, any offer or solicitation to purchase or subscribe for securities in any jurisdiction.

Today's Agenda

1 Company Update
- Change in Representative Director
- Joint Venture: Shift to Compensation Model

2 NAND Market Outlook

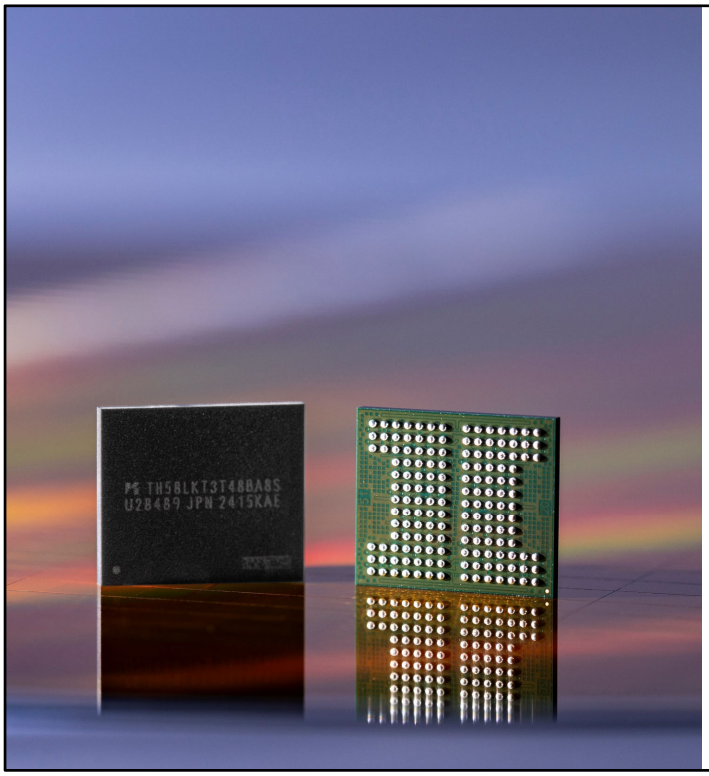
3 FY25 Q3 Results and Q4 Guidance

KIOXIA

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 3

My name is Fujikawa from the Corporate Communications Department.
Thank you for joining us today.

Before we begin the explanations on market trends and financial results, I would like to cover two points.



Company Update

First, regarding the executive changes:
On January 29 of this year, we announced the appointment of a new president for Kioxia Holdings Corporation and Kioxia Corporation.
Nobuo Hayasaka, Representative Director and President, will step down from his role as President and Chief Executive Officer effective March 31. His successor, Hiroo Oota, currently Executive Vice President, will assume the position of President and Chief Executive Officer effective April 1.

Furthermore, at the Ordinary General Meeting of Shareholders scheduled for June, Mr. Hayasaka will step down as Representative Director of both companies and will assume the role of Senior Executive Advisor to support the management team. On the same day, Mr. Oota is scheduled to be appointed as Representative Director.

Joint Venture: Shift to Compensation Model

Cash in & Accounting

4 Year Total (CY26-CY29)
1,165 Million USD
(Approx. 178.2 Bn Yen[1])

4 Year Average
Approx. 290 Million USD
(Approx. 45.0 Bn Yen[1])

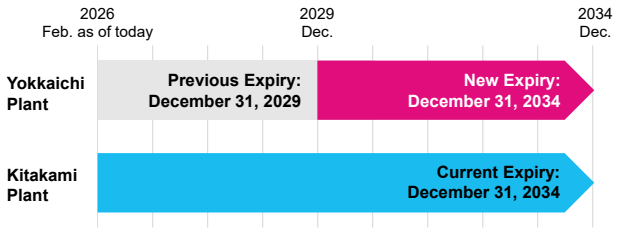
For reference: JV-related sales revenue 198.6 Bn Yen[2])

Accounting Recognition

- ✓ Equivalent to approx. 131 M USD[3] (approx. 20.0 billion yen[1]) in annual revenue and profit
- ✓ Incorporating two months' revenue/profit recognition into the FY25Q4 guidance

Purpose of compensation	For manufacturing services and continued availability of supply to Sandisk
Significance	Recognizing the value of Kioxia's manufacturing operations (tangible and intangible)
Contract Period	Extended for five years from the original date of December 31, 2029, to December 31, 2034

Joint Venture Contract Period



KIOXIA

1. Exchange Rate (USD / JPY) 153 Yen
2. Fiscal Year ended March 2025
3. 1,165 Million USD / 107 months (Feb. 2026 - Dec. 2034) X 12 months

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 5

Next, I will explain the extension of the joint venture agreement period and the revision of contract terms at the Yokkaichi Plant, which we announced on January 30.

We have agreed with Sandisk to extend the contract period of the joint venture (JV) at the Yokkaichi Plant by five years, from the end of 2029 to the end of 2034. As a result, similar to the Kitakami Plant, a long-term production framework operated through the JV will now also be secured for the Yokkaichi Plant.
In addition, as compensation for the manufacturing services we provide to Sandisk and for the continued supply of products, we will receive a total of 1.165 billion US dollars, or approximately 178.2 billion yen, in cash over the four years from 2026 to 2029. On an annual basis, this amounts to approximately 290 million US dollars, or about 45 billion yen per year.
We plan to record additional revenue from this cash compensation of approximately 131 million US dollars, or about 20 billion yen, per year for roughly nine years from February 2026 through December 2034. The entire amount will directly contribute to operating profit. While previously revenue from Sandisk for contract manufacturing was based on an at-cost model, totaling around 200 billion yen annually, this has shifted to a model in which we receive compensation for our manufacturing services.

To summarize: the contract extension period is five years, the cash prepayment period is four years, and the revenue recognition period is nine years.

Kioxia independently develops fundamental technologies, process technologies, and device fundamental design technologies ahead of its competitors and contributes those results to the JV, leading to efficient investment and mass production of highly competitive products.
In addition, Kioxia controls 100% of wafer manufacturing at the Yokkaichi and Kitakami plants, and independently controls all of the elements necessary for operation and production management at both sites. This includes the procurement of raw and indirect materials and equipment, optimization of automation systems, shortening of wafer processing times and production lead times, and production and yield management.

Our JV with Sandisk has shifted to a model which recognizes the core strategic and technological value of the Kioxia-owned manufacturing process, which commands a value-added margin in the marketplace. We believe this will further strengthen our cash flow and profitability over the coming years.
We will continue to leverage AI-enabled smart manufacturing and economies of scale to ensure stable production of advanced 3D flash memory while achieving world-class capital efficiency and manufacturing power.

Please note that, aside from the payment of compensation from Sandisk to us, no other terms of the JV agreement have been changed in connection with this contract extension.
The scope of collaboration of the JV and the timeline of the compensation are provided in the Appendix for your reference.

NAND Market Outlook

Next, I will explain the outlook of the NAND market.

NAND Market Outlook

NAND market growth fueled by AI-driven demand in DC/Enterprise

DC/Enterprise

Robust demand fueled by significant investments in AI

- Replacement demand for traditional servers continues
- Demand for AI inference workload remains strong
- Shortage of NL-HDDs is generating mid-term demand for high-capacity QLC SSDs

Smartphone/PC

Monitoring the unit shipment trend

- Market shift from low-cost models to AI-equipped, high-end models; Rising BOM (Bill of Materials) costs may limit overall volume

Supply/Demand

NAND demand is expected to exceed supply due to robust DC demand

- Bit Growth: Mid teens % in CY2025
- Bit Growth: High teens % in CY2026. Expected supply constraints

KIOXIA

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 7

To highlight the main points, we will again emphasize what we explained at the financial results briefing last November: demand from data centers and enterprise applications for AI continues to drive the expansion of the NAND market, and demand is expected to exceed supply both at present and in calendar year 2026.

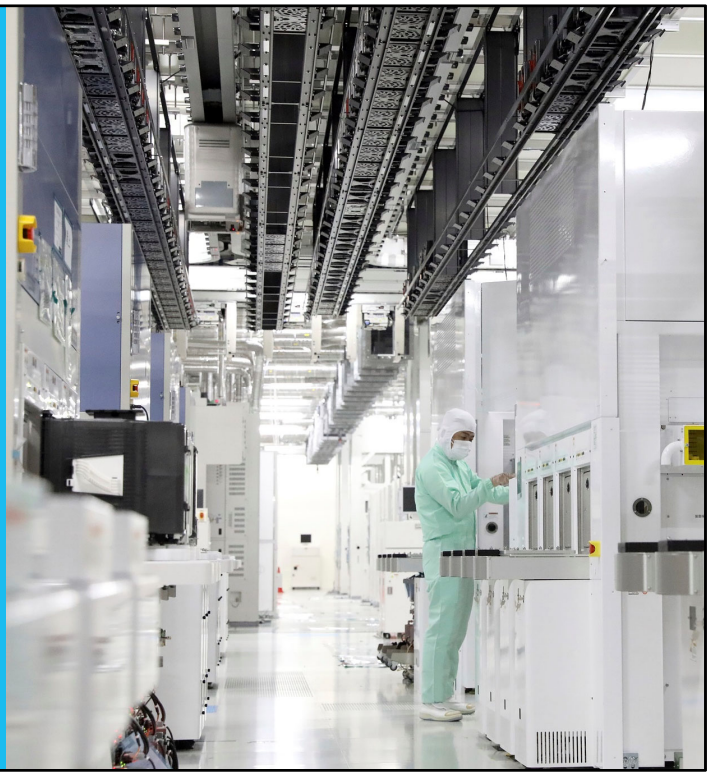
First, regarding the data center and enterprise NAND market, we recognize three key growth drivers:
1. Replacement demand for traditional servers continues.
2. Demand for AI inference workload remains strong.
3. A shortage of nearline HDDs is generating mid-term demand for high-capacity QLC SSDs.

Next, in the smartphone and PC NAND market, although there is a shift from low-priced models to high-end AI-equipped models, rising BOM (Bill of Materials) costs could reduce total unit shipments. We will continue to closely monitor future developments.

Demand remains extremely strong, and based on publicly available data, we believe investment discipline within the NAND industry is continuing, so overall demand is expected to exceed supply. We expect market bit growth to remain unchanged from our previous guidance, at the mid-teens percent for CY2025 and the high-teens percent for CY2026, taking into account potential ongoing supply-side constraints.

That concludes my explanation.

Fiscal Year Ending March 2026, Third Quarter Results and Fourth Quarter Guidance



I am Hanazawa, Chief Financial Officer. Thank you for your time today.

Financial Highlights (Three Months Ended December 31, 2025)

Revenue	Adjusted Non-GAAP Gross Profit[1]	Non-GAAP Operating Profit[1]	FCF	Net D/E Ratio[3]
Record High				
543.6 Bn Yen	**198.1** Bn Yen	**144.7** Bn Yen	**85.7** Bn Yen	**80%**
Including 51.4 Bn yen for JV-related sales	Margin **36%**	Margin **27%**		
	Margin[2] **40%**			
	After excluding for JV-related items			

KIOXIA

1. For a reconciliation of Non-GAAP items, please refer to pages 29, 30, 31 and 32 of this presentation
2. Excludes the revenue and cost of goods sold related to the JV. For JV-related information, please see page 11 of this presentation
   Gross Margin after excluding JV-related sales = Adjusted Non-GAAP Gross Profit (excluding R&D costs and JV) / Revenue (excluding JV) × 100
3. Net D/E ratio: (Bonds and borrowings - Cash and cash equivalents) / Total equity attributable to owners of the parent company. Foreign currency-denominated bonds are converted at the swap rate for those under a swap agreement

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 9

First, let me highlight the key financial figures for this quarter's results.

In the third quarter, we recorded a significant increase in both revenue and profit compared with the previous quarter.
Revenue reached 543.6 billion yen, the highest in our company's history.
Adjusted Non-GAAP gross profit was 198.1 billion yen with a margin of 36%, or 40% excluding JV-related items.
Non-GAAP operating profit was 144.7 billion yen with a margin of 27%, an improvement of approximately 7 percentage points from the previous quarter.
Free cash flow was 85.7 billion yen, marking the eighth consecutive quarter of positive free cash flow.
The net D/E ratio has continued to improve each quarter from Q1 of FY2024, coming down all the way to 80% in this last quarter.

I will explain the details on the following slides.

Three Months Ended December 31, 2025 Results

Quarterly

Both Non-GAAP operating profit and net income exceeded the upper limit of the guidance
Revenue is at an all-time high

Bn Yen	Q2 Results	Q3 Guidance Announced on Nov. 13	Q3 Results
Revenue	448.3	500.0 ~ 550.0	**543.6** QoQ +21.3%, YoY +20.8%
Non-GAAP Operating Profit	87.2 Margin 19.4%	100.0 ~ 140.0	**144.7** Margin 26.6% QoQ +66.0%, YoY +17.6%
Non-GAAP Net Income[1]	41.7 Margin 9.3%	61.0 ~89.0	**89.5** Margin 16.5% QoQ +114.9%, YoY +17.3%
Non-GAAP EBITDA[2]	165.8 Margin 37.0%	-	**222.0** Margin 40.8% QoQ +33.9%, YoY +11.1%
Non-GAAP Earnings Per Share (Yen)[3]	77.22	113.02 ~ 164.89	165.28
Exchange Rate (Yen) USD / JPY	147	151	153

ASP[4] (QoQ)
Low 10% range increase
Like-for-Like and Blended ASPs about the same

Bit Growth[5] (QoQ)
Mid-single-digit % increase

KIOXIA

1. Non-GAAP profit attributable to owners of parent
2. We use the term "Non-GAAP EBITDA" because it is derived from Non-GAAP Operating Profit
3. Non-GAAP basic earnings per share
4. USD basis
5. Bit basis

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 10

Let me highlight the results for the third quarter of the fiscal year ending March 2026.

Revenue reached a new quarterly record high, and both non-GAAP operating profit and net income exceeded the upper end of our guidance.

Compared with the previous quarter, sales prices continued the upward trend seen in the second quarter, increasing by low 10% range on a like-for-like basis. Blended ASP rose by a similar magnitude.

Shipments on a gigabyte basis grew in the mid-single-digit percentage range quarter-on-quarter, driven mainly by smartphones and data-center/enterprise products.

As a result, third-quarter revenue was 543.6 billion yen, up approximately 21% from the previous quarter.
Non-GAAP operating profit was 144.7 billion yen with a margin of about 27%, an improvement of approximately 7 percentage points quarter-on-quarter.
Non-GAAP net income was 89.5 billion yen, a significant increase.
The benefit of reduced interest payments from the refinancing conducted in July is now visible.

Earnings per share came to 165.28 yen. The exchange rate was 153 yen to the dollar, compared with 147 yen in the second quarter, reflecting yen depreciation and dollar appreciation.

Against guidance, higher-than-expected selling prices and favorable currency movements contributed to overall profitability. Shipment volume was roughly in line with expectations.

Sales Results by Application

Quarterly

Strong AI demand drove record revenue for Smart Devices and SSD & Storage

34%	Smart Devices[1]	186.3 Bn Yen QoQ: +18.4%, YoY:+59.1%	Smart Devices • The transition to 8th-gen BiCS FLASH™ drove strong demand in Q3 • Both volume and sales hit record highs
55%	SSD & Storage[2]	300.4 Bn Yen QoQ: +22.8%, YoY: +7.8%	SSD & Storage • Revenue Breakdown: DC/Enterprise approx. 60% PC & others approx. 40% • PCs: Sales increased QoQ mainly due to higher selling prices • DC/Enterprise: Record sales and GB shipment driven by strong AI server demand and higher pricing
10%	Others[3]	57.0 Bn Yen QoQ: +22.5%, YoY: +5.2%	

KIOXIA

1. Smart Devices: Includes memory products for smartphones, tablets, TVs, and other consumer electronics and automotive applications
2. SSD & Storage: Includes SSD products and memory products for PCs, data centers and enterprises (d/e)
3. Others: Includes retail products such as SD memory cards and USB memory devices, and revenue from sales to the Sandisk group through the joint venture

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 11

Next, I will explain our quarterly sales performance by application.

Our applications are classified into three categories: “Smart Devices,” “SSD & Storage,” and “Others.” The “Others” category includes B2C products such as SD memory cards and revenue from sales to Sandisk through our three manufacturing joint ventures.

In the third quarter, all application categories reached record-high revenue.

Smart Devices, which includes products for smartphones and tablets, recorded revenue of 186.3 billion yen, up 18.4% from the previous quarter and representing 34% of total revenue. The transition to our 8th-generation BiCS FLASH™ began accelerating in the second quarter, and solid demand continued into the third quarter, resulting in higher revenue.

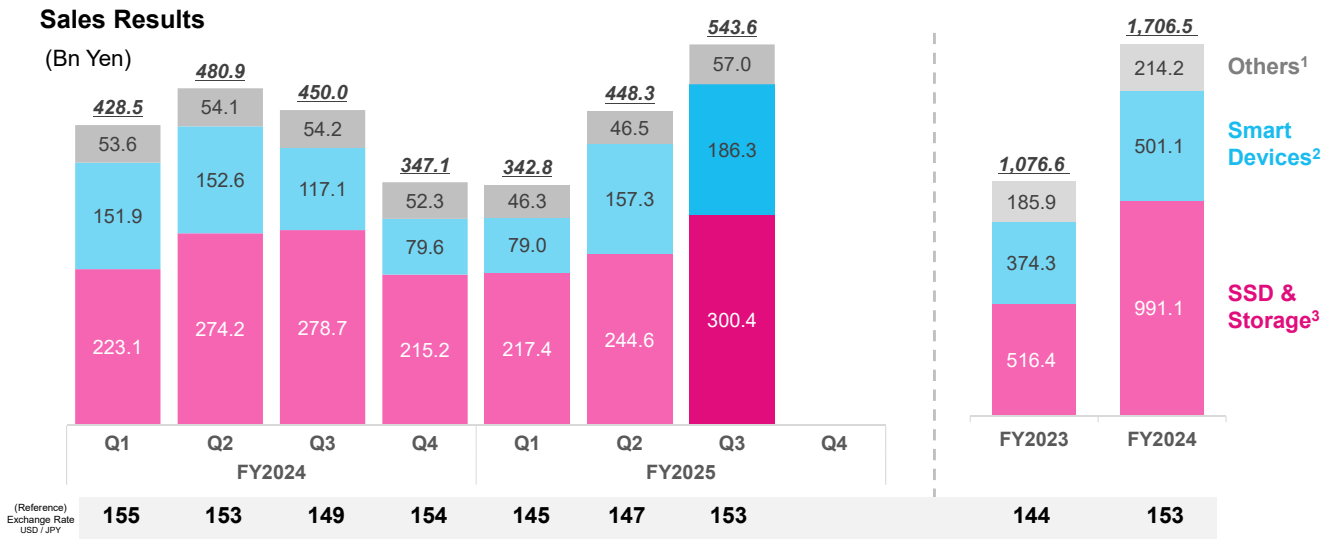
SSD & Storage, which consists of SSD and memory products for PCs and servers, recorded revenue of 300.4 billion yen, up 22.8% from the previous quarter and representing 55% of total revenue. Within this category, approximately 60% of revenue came from data-center and enterprise customers, and about 40% from PC and other applications.

PC and related segments saw higher revenue mainly due to increased selling prices.
Data-center and enterprise revenue increased quarter-on-quarter thanks to continued strong demand for AI servers and higher selling prices. Both shipment volume and revenue for data-center and enterprise products reached all-time highs.

Regarding SSDs equipped with our 8th-generation BiCS FLASH™ 2Tb QLC chips, we shipped the 122TB and 245TB models for customer qualification as planned at the end of CY2025. Other products using 8th-generation BiCS FLASH™ are also progressing smoothly through qualification with data-center and enterprise customers. We will continue to expand mass production and introduce to market new products tailored to AI-related needs.

Sales by Application (Quarterly Trend)

Top-line growth across all end markets to hit record high revenue in Q3



1. Others: Includes retail products such as SD memory cards and USB memory devices, and revenue from sales to the Sandisk group through the joint venture
2. Smart Devices: Includes memory products for smartphones, tablets, TVs, and other consumer electronics and automotive applications
3. SSD & Storage: Includes SSD products and memory products for PCs, data centers and enterprises (d/e)

KIOXIA

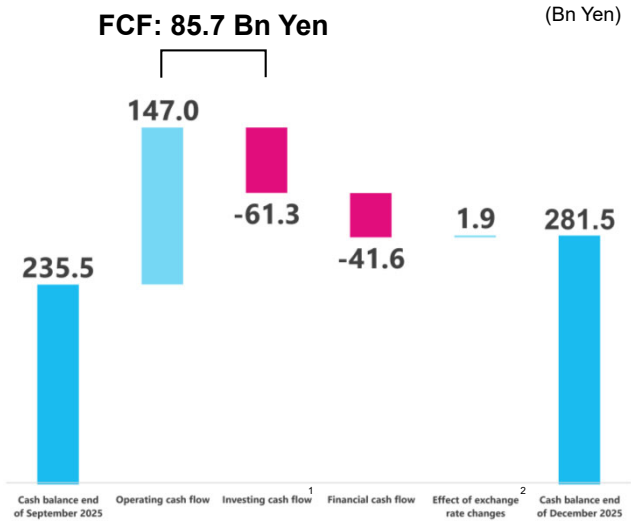
© 2026 KIOXIA Holdings Corporation. All Rights Reserved.

This slide shows the quarterly trends for each application category.
As you can see, in the third quarter, both Smart Devices and SSD & Storage achieved record-high revenue.

Cash Flow

Quarterly

Positive free cash flow for eight consecutive quarters through disciplined capital investment



Operating cash flow

- Improved from the previous quarter due to the increase in selling prices and volume
- Interest payments significantly decreased due to refinancing
  - ✓ Q2: 34.7 billion yen → Q3: 7.8 billion yen (Q2 includes one-off factors)

Investing cash flow

- Capex[3]: 70.9 Billion Yen
- Focused Capex on 8th generation of BiCS FLASH™ amid expanding production
- Investing in 10th generation of BiCS FLASH™ for future growth

KIOXIA

1. Investing cash flow: Capex of (70.9) billion yen + government grants of 8.6 billion yen + 1.0 billion yen in other items
2. Effect of exchange rate changes on cash and cash equivalents
3. Total capital investment excluding subsidies, etc.

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 13

Next, I will explain the cash flow for the third quarter.

Cash and cash equivalents at the end of December 2025 totaled 281.5 billion yen, an increase of 46 billion yen from the end of September.

Operating cash flow was 147 billion yen. Although we paid 19.8 billion yen in corporate taxes during the third quarter, higher selling prices and increased volume together with a substantial reduction in interest payments supported cash generation. As a result, we generated operating cash flow approaching 150.0 billion yen. The main reason interest expenses decreased from Q2 was the absence of the one-time refinancing fees recorded in Q2; other factors included the semiannual bond interest payments (made in January and July) and the effect of lower interest rates following refinancing. We will continue to control inventory and reduce costs to further maximize operating cash flow.

Investment cash flow reflected our strict financial discipline. Gross capital expenditures were 70.9 billion yen, and after accounting for 9.6 billion yen in subsidies and other items, net investment cash flow was minus 61.3 billion yen. The decline in subsidies compared with the second quarter is due to the timing of equipment inspections and is not related to any special factor. Free cash flow was a positive 85.7 billion yen, marking the eighth consecutive quarter of positive free cash flow. We will continue to enhance free cash flow and, in addition to strengthening our financial position, pursue growth investments such as R&D and appropriately scaled capital expenditures aligned with demand.

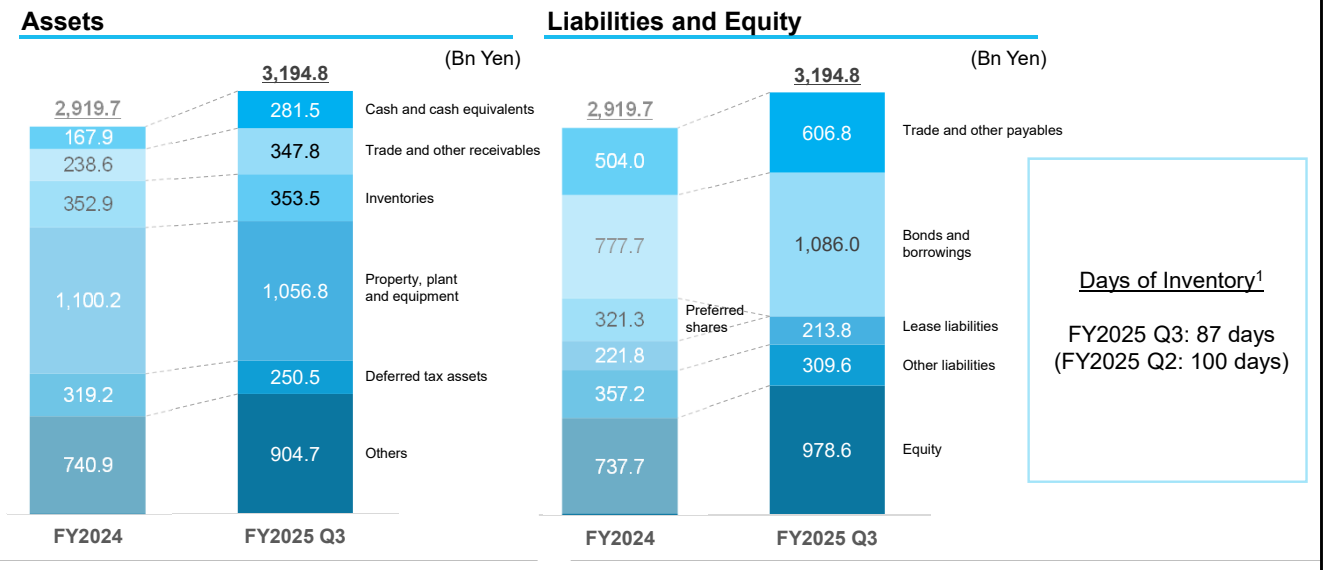
Financing cash flow was minus 41.6 billion yen, mainly due to debt repayments.

Gross capital expenditures for the fourth quarter are expected to be around 60 billion yen, and approximately 280 billion yen for the full fiscal year. Investments are focused on manufacturing equipment for the 8th-generation BiCS FLASH™, for which production is being expanded. We are also continuing investments for the future 10th-generation BiCS FLASH™. These investments prepare us to supply the products required by future AI-driven demand.

Balance Sheet

Quarterly

Continued to strengthen and optimize balance sheet for future growth



KIOXIA

1. Cost of Sales is based on Non-GAAP. Calculations are based on 360 days for the fiscal year and 90 days for the quarter. For the method of calculating Non-GAAP Cost of Sales, please refer to page 31 of this document.

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 14

Regarding the balance sheet:

Total assets as of the end of December 2025 were 3,194.8 billion yen, an increase of 275.1 billion yen compared with the end of fiscal 2024. Inventory levels decreased significantly, with days of inventory on a cost-of-sales basis falling from 100 days at the end of the second quarter to 87 days at the end of the third quarter. This was driven by continued NAND market conditions in which demand exceeds supply, as well as shipments for customers with LTAs and our response to additional customer requests.

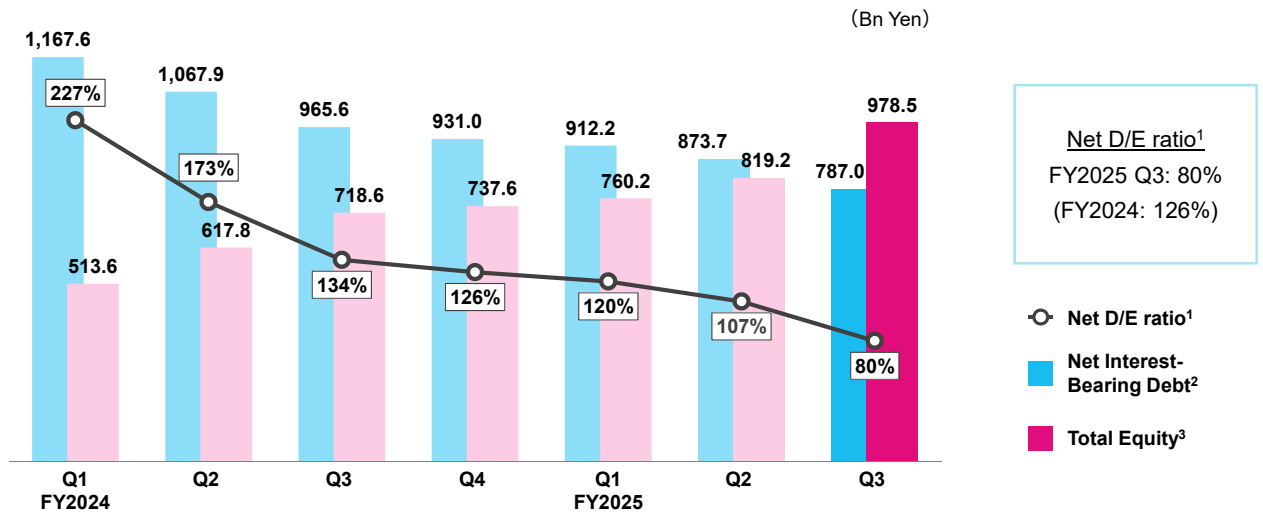
Bonds and borrowings totaled 1,086 billion yen. As explained earlier, through the generation of free cash flow, net interest-bearing debt (interest-bearing debt minus cash and cash equivalents) has decreased steadily to 787 billion yen.

Total equity increased to 978.6 billion yen, reflecting our ability to secure profit. This represents a significant improvement from 737.7 billion yen at the end of fiscal 2024, contributing to the strengthening of our capital structure.

We will continue to secure sufficient profit and maintain disciplined capital expenditures to accelerate the improvement of our financial position.

Enhancing Financial Structure: Transition of Net Debt-to-Equity Ratio

Continuing to improve net D/E ratio from FY2024 Q1, all the way down to 80% in FY2025 Q3



KIOXIA

1. Net D/E ratio: (Bonds and borrowings - Cash and cash equivalents) / Total equity attributable to owners of the parent company
2. Foreign currency-denominated bonds are converted at the swap rate for those under a swap agreement
3. Total equity attributable to owners of the parent

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 15

This slide shows the quarterly trend of our net D/E ratio. The line graph represents the net D/E ratio, while the bar graph shows net interest-bearing debt and total equity.

The net D/E ratio has decreased from 227% in the first quarter of fiscal 2024 to 80% in the third quarter of fiscal 2025. This improvement reflects both the reduction of net interest-bearing debt and the increase in equity, mainly through retained earnings. We aim to continue improving the net D/E ratio by generating operating profit and further strengthening our ability to produce free cash flow.

Guidance for the Fourth Quarter and Full Fiscal Year Ending March 2026

Bn Yen	Quarterly		Full Fiscal Year	
	FY2025 Q3 Results	FY2025 Q4 Guidance	FY2024 Results	FY2025 Guidance
Revenue	**543.6**	**845.0 ~ 935.0**	**1,706.5**	**2,179.8 ~ 2,269.8**
Non-GAAP Operating Profit	**144.7**	**440.0 ~ 530.0**	**453.0**	**717.0 ~ 807.0**
Non-GAAP Net Income[1]	**89.5**	**310.0 ~ 370.0**	**266.0**	**459.7 ~ 519.7**
Non-GAAP Earnings Per Share (Yen) [2]	165.28	569.36 ~ 679.56	507.89	844.31 ~ 954.51
Exchange Rate (Yen) USD / JPY	153	155	153	150

KIOXIA

1. Non-GAAP profit attributable to owners of parent
2. Non-GAAP basic earnings per share

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 16

Next, I will explain our guidance for the fourth quarter and the full fiscal year.
For both the quarterly and annual basis, we expect record-high revenue and profit. Following fiscal 2024, this year is expected to mark a second consecutive year of record results.

Revenue is projected to be in the range of 845.0 billion yen to 935.0 billion yen.
The biggest driver is selling prices, which we expect to rise significantly across all applications. Although total shipments on a gigabyte basis are expected to decline, the ratio of data-center and enterprise SSD shipments is expected to increase. For Smart Devices, demand for high-end smartphones remains strong, and shipment volume is expected to see only a slight decrease. We have also incorporated two months' worth of revenue and profit from the revised JV contract terms into the guidance.

Non-GAAP operating profit is expected to be 440.0 billion yen to 530.0 billion yen. We aim to further improve the margin from the 26.6% in the third quarter. In addition to higher selling prices, we will further increase profitability by expanding sales of high-value-added products such as data-center-oriented offerings.
Non-GAAP net income is expected to be 310.0 billion yen to 370.0 billion yen.

Both operating profit and net income include the impact of recognizing 12 billion yen of property tax for the full year in the fourth quarter in accordance with IFRS, but we expect profit growth to more than offset this.

The 8th-generation BiCS FLASH™ is on track to become our main product by the end of March 2026, with its production ratio exceeding that of the 5th generation as planned. We will continue to capture AI-related demand and expand competitive products to further enhance and improve profitability.

For the full fiscal year 2025, we expect revenue of 2.1798 trillion yen to 2.2698 trillion yen, non-GAAP operating profit of 717.0 billion yen to 807.0 billion yen, and non-GAAP net income of 459.7 billion yen to 519.7 billion yen, all reaching new record highs. We intend to leverage our world-class capital efficiency and manufacturing and development abilities to achieve profitability in line with best in the market.

Summary

1

Full-Year sales and profit to hit record highs for a second consecutive year

- ✓ Selling prices rising across all applications in Q4, with margins expected to rise further
- ✓ Profitability being driven by high-value product sales for DC/Enterprise through strong customer relationships
- ✓ Balance-sheet improvements progressed during Q3, resulting in a net D/E ratio of 80%

2

CY26 NAND market remains tight

- ✓ Significant data center demand growth creating supply constraints for the foreseeable future
- ✓ Scaling the competitive 8th-generation BiCS FLASH™ as a core product, ensuring technology leadership
- ✓ CY26: our growth projection is at least in line with market growth expectations

3

Joint Venture: Shift to Compensation Model

- ✓ To receive total of 1,165 million USD for manufacturing services and ongoing product supply (Average of 290 million USD per year for CY26-CY29)
- ✓ Yokkaichi Plant contract extended for five years

KIOXIA

© 2026 KIOXIA Holdings Corporation. All Rights Reserved. 17

Finally, let me summarize today's presentation.

First, for the full fiscal year 2025, both revenue and profit are expected to significantly surpass the previous year's record highs for the second consecutive year. Revenue is expected to exceed 2 trillion yen. In addition to strong results through the third quarter, we expect a substantial increase in selling prices in the fourth quarter, reflecting favorable market conditions. Leveraging our strong customer relationships, we will further expand sales of cutting-edge AI data-center products, and will enhance profitability even more through improvements to our portfolio. Our balance sheet is also steadily improving, with the net D/E ratio reaching 80% in the third quarter.

Next, for the NAND market outlook in CY2026, we expect supply–demand conditions to remain extremely tight for the foreseeable future, driven by strong growth in data-center demand. As a technology leader in the NAND industry, we will continue to expand our competitive 8th-generation BiCS FLASH™ as our main product and aim for growth at least in line with the market.

Lastly, our JV with Sandisk has shifted to a model with compensation for our services. The 1.165 billion US dollars we are receiving from Sandisk represents a recognition of the core strategic and technological value of the Kioxia-owned manufacturing process, which commands a value-added margin in the marketplace. We believe this will further strengthen our cash flow and profitability over the coming years.

Going forward, we will continue to capture the growing AI demand for NAND and SSD products, drive business growth, and show solid financial results through our world-class capital efficiency and manufacturing competitiveness.

That concludes my presentation. Thank you very much.

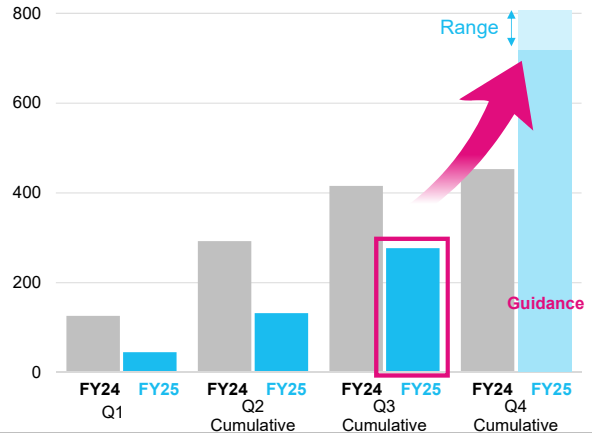
Nine Months Ended December 31, 2025 Results

For the nine-month cumulative period, revenue and profits declined YoY mainly due to lower selling prices and forex impacts. Currently, the upward trend in prices continues, and we expect record-high sales and operating profit for the full year.

Bn Yen	FY2025 Q1-Q3 Cumulative Results	YoY
Revenue	**1,334.8**	**(1.8%)**
Non-GAAP Operating Profit	**277.0** Margin 20.8%	**(33.3%)**
Non-GAAP Net Income[1]	**149.7** Margin 11.2%	**(40.8%)**
Non-GAAP EBITDA[2]	**512.6** Margin 38.4%	**(21.1%)**
Non-GAAP Earnings Per Share (Yen)[3]	277.10	(43.1%)
Exchange Rate (Yen) USD / JPY	149	4 yen appreciation

Bn Yen **Non-GAAP Operating Profit**



KIOXIA

1. Non-GAAP profit attributable to owners of parent
2. We use the term "Non-GAAP EBITDA" because it is derived from Non-GAAP Operating Profit
3. Non-GAAP basic earnings per share
